

## Everything is Politics

Chorus:

*Everything is Politics  
Aint nowhere you can hide  
From the color of your skin  
To the rims on yo ride  
Emphasized in our lives by the truth-tainted lies  
Everything is Politics  
Diplomacy in Disguise*

*You eat it you sleep it  
You breathe it you speak it  
You buy it you roll it  
You light it you snort it  
You sell it you've tried it  
You love it you hate it  
You ride it you fly it  
You try to deny it  
Diplomacy in disguise*

You see the problem is, it aint always so obvious  
No one has taught you this cause they don't wanna be stopping this

Critical analysis political citadel palaces  
Create cerebral calluses  
Obscure multiple malices

And if you think I'm talking shit then just look around  
Politics will rape the earth and straight shake the ground

The way you think  
The water you drink  
The school you attend  
The letters you send  
Your coffee blend  
New Fashion trend  
The money you spend  
The mobile transportation on which you depend  
Your family and friends  
Who your music offends

What you seek to transcend  
All politically relevant  
It's fucking you everyday aint no way to remain celibate  
I'm telling it like it is  
It started when we were kids  
Government policy dictating standardized testing  
History class manipulating what you're digesting  
Shaping you're world view  
Before you knew  
What was false or true  
Shut up and fill in the bubble  
Keep independent thoughts to yourself or you'll get in trouble  
Taxes build bombs that turn countries to rubble  
Examine what they handin' you  
You will understand it's true  
Billboards on the street  
You're favorite television show  
Soft propaganda for the status quo  
Everything is politics socio-sexual socio economic  
Yellow cake WMDs and bombs that's atomic  
So it's kinda ironic when people try to deny it

You eat it you sleep it you breathe it you speak it you buy it  
You roll it you light it you snort it you sell it you've tried it  
You love it you hate it you ride it you fly it you fight it

### *Chorus*

You'd best recognize what they feed your eyes  
It applies to everyone livin' under the skies  
And if you don't know the time best to get a watch  
If that light bulb is out get the kilowatts  
When you can't get a job when you kill steal and rob  
When your friend kills himself on a heroin nod  
When you buy food to eat when you ride on the street  
When yo moms 9 to 5 tryin' to make ends meet  
It's all politics niggaz act like its not  
From capitol hill to the hood on yo block  
To the 40 caliber calico carrying glocks  
That are mass produced as if they will never be shot  
And if you try to deny it you just playin yourself  
The government controls the medicine you use for your health  
Corporate monopoly for everything on the shelf

Gross product income  
The national interest is wealth  
But its all on the stealth you gotta read between the lines  
To identify strategically constructed crimes  
It's a sign of the times  
Silver screens and pantomimes  
Subversively representing hidden agendas  
Make it hard to separate the real from the pretenders  
But as long as you know that's it's all just a show  
Remember that it's important cause the issues that they sortin'  
Effect you on the everyday  
Don't get caught up in the fray

*Chorus*
